**Subject: Recommendation Letter**

Dear Sir/Madam,

It's my pleasure to write this letter of recommendation for Jagadish, with whom I have been acquainted since 2020, as I am his faculty advisor. At present, I am the instructor for Bioinformatics in his class.

Jagadish is a dedicated and curious student with a strong foundation in Bioinformatics. His active participation in my Bioinformatics class and engagement in coursework, research papers, and articles demonstrate his commitment to the field. His interest in exploring multidisciplinary approaches to problem-solving and performance in lab works indicate a genuine enthusiasm for learning and research.

Moreover, his involvement in extracurricular activities, such as being a part of the Bioscience Society and taking on leadership roles in organizing technical, cultural, and sports events, showcases his well-rounded skills, including event management, communication, and teamwork. His success in coding competitions and contributions to the technical team for creating the website of the 3rd International Conference in Frontiers in Biological Sciences (Incofibs) highlight his technical proficiency.

It's clear that Jagadish is not only academically inclined but also actively seeks opportunities to apply his technical knowledge in the field of Life Sciences. His participation in seminars and webinars, both on and off-campus, further indicates his passion for staying updated with the latest developments in life sciences.

Overall, Jagadish seems to be an ideal candidate for research opportunities, given his academic excellence, technical skills, leadership qualities, and genuine enthusiasm for acquiring knowledge in the field of biology.

I wish him all the best in his endeavors.

Let me know if you have any other queries.

Sincerely,

Dr. Bibekanand Mallick
